I wanted to let you know that a number of environmental groups have asked the Region 4 Administrator to conduct LEAF testing on a material called EZBase. They are claiming that EZBase is similar to Agremax and that it also poses environmental harm. A link to that letter is attached below.

I'm reaching out to my RCRA counterparts in Region 4 to find out what their response is to the letter

Lenny Voo, Acting Chief
RCRA Compliance Branch
USEPA - Region 2
212-637-1473 (O)
212-637-4207 (F)
